## Platform Scales

Process Automation offers a wide range of low-profile platform scales. These range in dimensions from 750x750mm through 3,0x4,0m and are fabricated from mild steel as standard (others optional).

- Capacities are available from 100 kg to more than 10,000 kg.
- These rugged weighing platforms are designed for the harsh Mining /Industrial environments.
- The weigh decks/platform can be customised to the users requirements, including on/off ramps, roller decks etc.
- The platforms employ strain gauge weight sensors, guaranteeing high accuracy and reliability.
- Our range of Indicating terminals provides further flexibility.
- Fieldbus support provides easy interface to the Supervisory Computer.
- Accurate and reliable weighing.
- Heavy duty & purpose built options available

## Platform Scale with Shock Dampening

### Specifications

Construction	Welded Steel & Painted (Std.) – Others on Request	
Dimensions	<i>L&amp;W (mm)</i>	<i>Capacities (tonnes)</i>
	750 x 750	0.3 – 1.0
	1000 x 1000	0.3 – 4.0
	1500 x 1500	0.5 – 5.0
	2000 x 2000	1 – 5
	4500 x 2500	2 – 5
	4000 x 3000	2 – 5
	CUSTOM	
Load Cells	High accuracy strain gauge type from stainless steel
